

2024 Southern Cross Reliability Trial

7th – 8th September 2024

The 2024 Southern Cross Reliability Trial is a new slant on our sport. Taking all the great ideas and implementations from our 'Sheep Station' events we have created a super 2 day event that will take crews through many new areas travelling some of the best and most scenic driving roads our state has to offer.

This is a Timed Event,

Day 1 starting and ending in Canberra.

Day 2 again starting in Canberra and concluding in Goulburn to allow everyone an easy drive home.

Across the weekend, competitors will travel about 800 kilometres with approximately 95 kilometres of very good, unsealed roads.

To get you on your way and through the weekend trial, you are able to choose between 4 different classes of navigation.

Pro – The most challenging navigation suitable for CRC Masters crews.

Semi Pro – Less challenging than Pro and suitable for CRC Apprentice crews.

Pro Am – For those that want to step up from CRC Tour events with a mix of route chart and basic navigation.

Sport – Route charted instructions suitable for CRC Tour crews.

No matter what class you are entered in, it will be a weekend that you will enjoy and the navigation in all classes will get you safely there and back with a smile on everyone's face.

The event is an amazing driving experience with great roads and areas with a mix of short and long runs to settle into. There are also one or two awesome mountain passes to travel through but no matter what, drivers will need to work closely with their navigators and they will need to be on their toes to keep on time.

The Southern Cross Reliability Trial not only is a timed event, but it also includes an economy component that will be part of each teams scoring. This is worked out so that all cars are comparable regardless of engine capacity.

Early Bird entries open Thursday 30th May or upon publication of information on the CRC & Drivetek websites with the first 10 Early Bird entries receiving a special event cap.

All additional information can be found in the supplementary regulations and information that will be sent out to entrants.

We look forward to seeing you there.

Regards

Jon, Tina & Lui
